Crush cans lightly by hands. Disposal of oil cans are also available.			•It has to be metal smaller than a one-ton can. •Oil cans are acceptable.			Be sure to use up the can and make holes them. Remove plastic parts and wrapping film, and put them in "Other"															Cosmetic bottles are not acceptable.																					
*Be sure to remove the cap and rinse							*Dispose of paper products without tying them up.				*Wash dirty items				*Please do not take out trash on rainy days			※Items that cannot be accepted . •Palm oil, even if it is vegetable oil			•Do not break. (Broken items are also acceptable)			*up to the size of the container *Items that do not fit in the container are oversized garbage				•Button batteries may contain mercury, so please separate them from dry cell batteries.		※Take them to the City Office for disposal.												
Items that are rusty and in such bad shape that they are crumbling should be classified as "Metals".		When making hole in a can, be sure to carefully read the manufacturer's instructions and always proceed with caution in a well - ventilated outdoor area, away from any fire hazards.		Do not remove labels. Oil bottles and craft beer bottles should be disposed of in the appropriate places according to their color.		•Remove the cap and spout. •Make sure to wash before disposal. •Largely broken bottles are also acceptable. The following items should go to "Landfill disposal": •Cosmetic bottles •Milky white bottles •Broken bottles smaller than the container's hole		•Place in a bag to prevent staining. •Rinse with water, cut open, and dry before disposing		•Flyers refer to advertising papers inserted into newspapers. •Booklets should be disposed of in the "Magazines and Scrap paper"		•Remove synthetic leather or vinyl covers. They are burnable trash. •The outer packaging of six-packs of canned beer also burnable trash.		•Remove metal, duct tape, shipping label, etc. •Fold paper boxes before disposing of them.		•Crush sideways. •Wash colored items, oil, dressing, and sauce bottles clean and put them in "Other plastics garbage". •Labels are also "Other plastics garbage".			•Colored ones or patterned ones are also acceptable. •Hard materials are "Other plastic garbage".		※Following items are burnable trash. •Containers with chlorine bleach •Plastic that cannot be cleaned or has small metal parts that cannot be removed. •Vinyl chloride products ※You may put them all together in a plastic bag. (Please do not tie the bag.)			※Take the following items to the burnable trash. •Clothes with wadding •Curtains •Hats •Stuffed toys •Heavily soiled items			•Animal oils such as lard and butter •Machine oil, engine oil, heavy fuel oil, kerosene			•Light bulbs should be disposed of in landfills.			•Items up to a size that can fit into a container (40cm x 60cm x 24cm) can be disposed of. •(Note) Car batteries cannot be disposed of for separate collection. •Items that do not fit into a container should be put out on bulky waste collection day or bring them to the Clean Center by yourself.				Since batteries contain harmful substances. Please dispose of them as "Dry batteries" rather than "Landfilling", even if it is worn out.		•Button batteries are slightly thicker and smaller in size than coin cells.		※Excluding button batteries, dry batteries, and fluorescent lights	
The following containers or flexible intermediate bulk container will be set up at Separate Collection Locations. Please put them into each container by yourself.
